

ABSTRACT OF THE DISCLOSURE

A method, apparatus, and article of manufacture provide the ability to broadcast premium video programming. Thus, once premium video programming is received, it is encoded into the vertical blanking interval and unused/non-interfering Active lines
5 found in a typical television broadcast. However, the encoded information is completely transparent to the pre-existing/typical television channel. The resulting encoded content is then broadcast with the typical television broadcast.

"Express Mail" mailing label number EV3299 Sb008u S
Date of Deposit Nov. 3, 2003
